## Introduction

More than 20 years have passed since the publication of SPINE, the current English curriculum taught at basic and secondary stages in Sudan. Since the publication of SPINE, a lot has changed in terms of methodologies, learning trends and educational guidelines.

This new English language curriculum, SMILE (Sudan Modern Integrated Learning of English), is specially tailored to Sudanese pupils in general education and it is intended to replace the SPINE Curriculum. It is a response to the decision made at the 2012 Educational Policy Conference to introduce Sudanese pupils to the English language earlier to improve the English language standard in Sudan.

The Federal Ministry of Education and the NCCER-Bakhter-Ruda in partnership with the World Bank Basic Education Recovery Project (BERP) and in collaboration with the British Council in Khartoum, worked to produce the SMILE Curriculum.

The SMILE Curriculum is the result of collective work done by national and international material writers, consultants, special advisors and artists, all under the supervision and administration of the NCCER.

The introduction of English language learning in the basic level grades aims to prepare Sudanese pupils to participate productively in the 21 st century. Pupils will become aware of the significance of English as an international means of knowledge and communication.

The SMILE series is comprised of the following components:

1. A Pupil's Book.
2. An Activity Book.
3. A Teacher's Book.
4. CD/ Mp3s.
5. Posters/ Flashcards.

The SMILE series is a pupil-centred, standards-based curriculum. It targets phonics and makes use of cross-curricular topics and enjoyable learning activities to motivate younger learners. Both print and cursive handwriting
are introduced from the very beginning of the course. The SMILE Curriculum intends to develop a positive attitude towards English as a foreign language and teaches the four langage skills (listening, speaking, reading and writing) simultaneously.

The SMILE Curriculum adopts communicative approaches for teaching English as a foreign language at the basic level in Sudan. Communicative mechanisms such as Total Physical Response (TPR), storytelling, guessing games, roleplays, body language, problem solving drills, spelling practice, phonic drills and the incorporation of cross-curricular material ensure that pupils are exposed to many ways to practise English communicatively.

The SMILE Curriculum's evaluation and assessment methods utilise both formative and summative approaches. At all levels, assessment emphasises the achievement of both standards and their indicators for each grade, aiming to attain and guarantee a high quality assurance curriculum and to confirm a High Stake Standards Benchmark (HSSB) syllabus. Moreover, at all levels, a cross-curricular dimension that also includes life skills, morals, traditions and values has been incorporated thoroughly into the content of the syllabus; adding relevance and cohesion with the rest of the basic level curricula subjects.

By the end of the basic level at grade 9 pupils should:

1. have developed a positive attitude towards the English language.
2. have participated in enjoyable pupil-centred learning, which employs the use of interactive drills, simple stories, rhymes, chants, language games, phonic activities, arts, project work and integrated language skills development.
3. have built their confidence and self-esteem through active use of the language.
4. have acquired a strong foundation for the four linguistic skills: listening, speaking, reading and writing.
5. be able to understand, reply to and participate in dialogues, roleplays and interviews using a variety of lexical sets and formulaic expressions. 6. be able to read and write a variety of different text types for a variety of purposes suitable to their age group.
6. have developed various life skills, including critical thinking, problem solving and decision making.
7. have received positive input about their own Sudanese culture and that of English speaking countries.
8. have raised their awareness about the diversity of cultures within Sudan.
9. have developed cross-curricular skills.
10. be able to read and understand national and international supplementary readers in later grades.
11. have received inclusive teaching and encouragement regardless of linguistic aptitude and performance through the use of special educational teaching strategies.
12. have been exposed to examples of modern technology.
13. have achieved level B1 of the Common European Framework (CEF).

SMILE textbooks consist of twelve units which follow a consistent format: every unit has eight lessons. Lesson 8 is always a revision for the previous lessons of the unit. Most units include two recordings; these are of dialogues, chants and/or stories. Most units also include a story. Unit 12 revises learning from previous units, while for Books $2-7$, Unit 1 consolidates learning from the previous year's book.

We hope that the SMILE Curriculum will be accessible to pupils, teachers, supervisors and parents.

With best regards,

Dr Hamdan Ahmed Hamdan Abuanja Head of the English Language Department - NCCER Bakhter-Ruda, November 2016
